SUBJECT INDEX

Alkan-*n*-ols
The hydrophobic effect in aqueous solutions of positional isomers of alkan-*n*-ols. A calorimetric study at 298.15 K, 305

Alunite
The surface of an ideal crystal of alunite in mathematical close-up. Part I. Qualities and surface concentrations of defect ions, 23
The surface of an ideal crystal of alunite in mathematical close-up. Part II. Localization of surface ions and a map of local electrical charges of the surfaces $10\bar{1}1$, 35

Aminoacidate bis-phenanthroline chlorides
Cobalt(III) aminoacidate bis-phenanthroline chlorides: preparation and characterisation by thermal analysis and other analytical methods, 215

Bis(ethylenediamine) copper(II) halide
Thermal decomposition kinetics. Part XVII. Kinetics and mechanism of thermal decomposition of bis(ethylenediamine)copper(II) halide monohydrate, 253

Comet Halley
A computational evaluation of the gas-phase water dimerisation equilibrium constant in the low temperature region with particular attention to the interpretation of Giotto and Vega flyby observations of the coma of Comet Halley, 109

Cyclic ligand complexes
Thermal investigation and stereochemical studies of some cyclic ligand complexes of copper(II) and cadmium(II) in the solid state, 289

Defect ions
The surface of an ideal crystal of alunite in mathematical close-up. Part I. Qualities and surface concentrations of defect ions, 23

1,2-Dibromoethane
Thermodynamics of molecular interactions in mixtures of 1,2-dibromoethane and xylenes at 298.15 K, 227

1,2-Difluoroethane
Conformers of 1,2-difluoroethane: their thermodynamic interplay and the extremum temperature course of some terms, 119

DNA
Analysis of a model system for the interaction between DNA and histone H1, 155

Doping
The effect of doping on the thermal decomposition of sodium bromate, 269

DTA
A study of the thermal effects observed in DTA. Part 2. The influence of sample and reference system parameters on a typical DTA curve, 173
A study of the thermal effects observed in DTA. Part 3. The influence of a holder around the sample and reference materials on a typical DTA curve, 191

Flow calorimeter
Simultaneous measurement of excess enthalpies and solution densities in a flow calorimeter, 127

Giotto
A computational evaluation of the gas-phase water dimerisation equilibrium constant in the low temperature region with particular attention to the interpretation of Giotto and Vega flyby observations of the coma of Comet Halley, 109

Histone H1
Analysis of a model system for the interaction between DNA and histone H1, 155

$KClO_4$
Thermal behaviour and firing characteristics of $Zr/KClO_4$ primer mixture containing different particle sizes of zirconium, 329

KNO_3
Measurement of thermophysical properties of KNO_3, 167

Light scattering
Thermodynamics of liquid mixtures studied by light scattering, 237

γ-MnO_2
Structural modification on heat treatment of γ-MnO_2, 13

Natrolite
Kinetics and mechanism of dehydration of natrolite and its potassium exchanged form, 45
Neopentylglycol
Calorimetry and X-ray diffraction investigations of the binary system neopentylglycol–pentaerythritol, 1
Nitrate ester
Thermal decomposition of energetic materials. Part 51. Kinetics of weight loss from nitrate ester polymers at low heating rates, 71

PCL/BDNPA/F
Thermal behaviour and compatibility of polyurethane PCL/BDNPA/F and PCL/TMETN blends, 277
PCL/TMETN
Thermal behaviour and compatibility of polyurethane PCL/BDNPA/F and PCL/TMETN blends, 277
Pentaerythritol
Calorimetry and X-ray diffraction investigations of the binary system neopentylglycol–pentaerythritol, 1
Picoline-*N*-oxide
Thermochemistry of pyridine- and picoline-*N*-oxide complexes of arsenic trihalides, 143
Polymers
Thermal decomposition of energetic materials. Part 51. Kinetics of weight loss from nitrate ester polymers at low heating rates, 71
Polypyrrole complexes
Thermal stability and degradation of some chemically synthesized polypyrrole complexes, 57
Polyurethane
Thermal behaviour and compatibility of polyurethane PCL/BDNPA/F and PCL/TMETN blends, 277
Pyridine-*N*-oxide
Thermochemistry of pyridine- and picoline-*N*-oxide complexes of arsenic trihalides, 143

Selenites
Determination of the thermodynamic parameters of some slightly soluble selenites, 337
Sodium bromate
The effect of doping on the thermal decomposition of sodium bromate, 269
Sodium orthophosphate
Thermal analysis of dihydrated sodium orthophosphate crystals in the temperature range 25–600 °C, 203
Stereochemical studies
Thermal investigation and stereochemical studies of some cyclic ligand complexes of copper(II) and cadmium(II) in the solid state, 289
Sulfur
On the thermal characterization of the system sulfur–tetracyanoethylene, 315

Tetracyanoethylene
On the thermal characterization of the system sulfur–tetracyanoethylene, 315
Tetrahydrofuran
Gibbs energies of transfer of individual ions from water into tetrahydrofuran and its aqueous mixtures, 79

Urea
Gibbs free energies of transfer of individual ions from water into water–urea mixtures, 95

Vega
A computational evaluation of the gas-phase water dimerisation equilibrium constant in the low temperature region with particular attention to the interpretation of Giotto and Vega flyby observations of the coma of Comet Halley, 109

Xylenes
Thermodynamics of molecular interactions in mixtures of 1,2-dibromoethane and xylenes at 298.15 K, 227

Zr
Thermal behaviour and firing characteristics of $Zr/KClO_4$ primer mixture containing different particle sizes of zirconium, 329
